

Muhammad Abdullah Nadeem

Lahore, Pakistan | abdvl.n18@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

BS Computer Science / *University of Lahore*

2024 – 2028

- Relevant coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Information Security, Web Technologies

Frontend Web Development Bootcamp / *IEC.org.pk*

2025

- Covered Bootstrap, Tailwind CSS, JavaScript, and React.js; built pixel-accurate, functional interfaces from UI designs

TECHNICAL SKILLS

Languages: JavaScript (ES6), C++, C, Python

Frontend: React.js, Tailwind CSS, Bootstrap 5, HTML5, CSS3, Vite, ShadCN, React Router

Tools & Design: VS Code, Antigravity, Claude, ChatGPT, Git/GitHub, Vercel, Figma, Framer

Databases & Productivity: MySQL, MS Office

EXPERIENCE

Frontend Web Development Intern / *CodeAlpha (Remote)*

July 2026 – Present

- Delivered multiple frontend projects (see Projects below) using HTML5, CSS, Bootstrap, and JavaScript
- Collaborated remotely on frontend deliverables, following Git/GitHub version control best practices

PROJECTS

Image Gallery / *CodeAlpha* / *HTML5, CSS, Bootstrap, JavaScript* / [GitHub](#)

July 2026

- Built a responsive image gallery web app with dynamic layout and interactive image display
- Version-controlled and deployed the project on GitHub as part of remote internship deliverables

Calculator App / *CodeAlpha* / *HTML5, CSS, Bootstrap, JavaScript* / [GitHub](#) | [Live Site](#)

July 2026

- Developed a fully functional calculator supporting core arithmetic operations with a responsive Bootstrap UI

VS Code–Themed Portfolio *Personal* / *React.js, Vite* / [GitHub](#) | [Live Site](#)

July 2026 – Present

- Designed and built a personal portfolio site styled after the VS Code editor interface
- Structured the UI with reusable React components and Tailwind CSS for styling

Banking App UI Clone / *HTML5, CSS, Bootstrap* / [GitHub](#) | [Live Site](#)

December 2025

- Converted a Figma banking-app design into a pixel-perfect, fully responsive HTML/CSS interface
- Deployed the static site to Vercel for live demonstration

Academic C++ Projects / *Data Structures & OOP* / *University of Lahore*

2026

- HR & Payroll Management System: terminal-based OOP application in C++ to manage employee records and calculate payroll
- Supermarket Billing System: terminal-based application using arrays, linked lists, and stacks to handle billing and inventory
